

BOVINE IgG whole molecule Agarose Conjugated - 001-0050

Code: 001-0050

Size: 10 mg

Product Description: BOVINE IgG whole molecule Agarose Conjugated - 001-0050

Concentration: 3.86 mg antibody per cc agarose

PhysicalState: Suspension of agarose beads

Label	Unconjugated
Buffer	0.01 M Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Stabilizer	None
Preservative	0.01% (w/v) Sodium Azide
Storage Condition	Store vial at 4° C prior to opening. DO NOT FREEZE.
Synonyms	Bovine IgG Whole Molecule Agarose Conjugate, Bovine IgG Agarose
Application Note	Bovine IgG Agarose is suitable for immunoprecipitation and Immunoaffinity purifications.
Background	Bovine IgG whole molecule Agarose Conjugated product is made from IgG, secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsinization for phagocytosis. The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc receptor proteins, as well as the F(ab) region possessing the epitope-recognition site. Both heavy and light chains of the antibody molecule are present.
Purity And Specificity	This product is purified Bovine IgG isolated from normal Bovine Serum coupled to activated agarose. Sufficient antibody capacity is provided to bind a minimum of 10 mg of anti- Bovine IgG.
Expiration	Expiration date is one (1) year from date of opening.
