

MOUSE IgG2a isotype control Rhodamine conjugated - 010-0041

Code: 010-0041

Size: 100 µL

Product Description: MOUSE IgG2a isotype control Rhodamine conjugated - 010-0041

Concentration: 0.2 mg/mL by UV absorbance at 280 nm

PhysicalState: Lyophilized

Label	Rhodamine (TRITC)
Emission Wavelength	570
Excitation Wavelength	550
Buffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Reconstitution Volume	100 µL
Reconstitution Buffer	Restore with deionized water (or equivalent)
Stabilizer	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
Preservative	0.01% (w/v) Sodium Azide
Storage Condition	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Synonyms	Rhodamine conjugated Mouse IgG2a subclass isotype control, Mouse IgG2a isotype control TRITC conjugation
Application Note	Mouse IgG2a isotype control can be utilized as a control or standard reagent in Flow cytometry, Western Blotting, and ELISA experiments where determination of sample isotype is important.
Background	Isotype controls are important for Flow Cytometry and have no specificity for target cells within a particular experiment. Their purpose is to confirm the specificity of primary antibody binding that it is not a result of non-specific Fc receptor binding to cells or other cellular protein interactions. Isotype controls need to be matched to the specific primary Abs (species and isotype, including heavy and light chains) being used.
Purity And Specificity	This product was prepared from normal serum by delipidation, salt fractionation, ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Mouse IgG2a and anti-Mouse Serum.
Assay Dilutions	User Optimized
ELISA	User Optimized
Western Blot	User Optimized
FLISA	User Optimized
IF Microscopy	User Optimized
Flow Cytometry	1:1000-1:5000
Other Assays	User Optimized
Expiration	Expiration date is one (1) year from date of opening.
