

MOUSE IgG3 isotype control Fluorescein conjugated - 010-0243

Code: 010-0243

Size: 100 µg

Product Description: MOUSE IgG3 isotype control Fluorescein conjugated - 010-0243

Concentration: 1.0 mg/mL by UV absorbance at 280 nm

PhysicalState: Lyophilized

Label	Fluorescein (FITC)
Emission Wavelength	528
Excitation Wavelength	495
Buffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Reconstitution Volume	100 µL
Reconstitution Buffer	Restore with deionized water (or equivalent)
Stabilizer	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
Preservative	0.01% (w/v) Sodium Azide
Storage Condition	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Synonyms	Fluorescein conjugated Mouse IgG3 isotype control, Mouse IgG3 subclass isotype control FITC conjugation
Application Note	Mouse IgG3 isotype is designed for immunofluorescence microscopy, flow cytometry, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
Background	Isotype controls are important for Flow Cytometry and have no specificity for target cells within a particular experiment. Their purpose is to confirm the specificity of primary antibody binding that it is not a result of non-specific Fc receptor binding to cells or other cellular protein interactions. Isotype controls need to be matched to the specific primary Abs (species and isotype, including heavy and light chains) being used.
Purity And Specificity	This product has been prepared from serum-free tissue culture supernate by protein A chromatography. Typically less than 1% cross reactivity against other mouse heavy or light chain specific antibodies was detected by ELISA.
Assay Dilutions	User Optimized
ELISA	User Optimized
Western Blot	User Optimized
FLISA	User Optimized
IF Microscopy	User Optimized
Flow Cytometry	1:1000-1:5000
Other Assays	User Optimized
Expiration	Expiration date is one (1) year from date of opening.
