

SWINE IgG F(ab')₂ fragment (BULK ORDER) - 014-0104

Code: 014-0104

Size: 2 mg

Product Description: SWINE IgG F(ab')₂ fragment (BULK ORDER) - 014-0104

Concentration: 2.0 mg/mL by UV absorbance at 280 nm

PhysicalState: Liquid (sterile filtered)

Label	Unconjugated
Buffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Stabilizer	None
Preservative	0.01% (w/v) Sodium Azide
Storage Condition	Store vial at 4° C prior to opening. This product is stable 4° C as an undiluted liquid. Dilute only prior to immediate use. For extended storage mix with an equal volume of glycerol, aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing.
Synonyms	Swine IgG F(ab') ₂ fragment, Swine IgG Fab ₂ fragment
Application Note	Swine IgG F(ab') ₂ Fragment reagents are ideal for ELISA, western blotting, Immunohistochemistry, as well as other antibody detection methods.
Background	Swine IgG F(ab') ₂ Fragment is a proteolytic fragment of immunoglobulin G (IgG) obtained by limited digestion with the enzyme pepsin under controlled conditions of temperature, time and pH. Swine IgG F(ab') ₂ molecules lack the Fc portion of Swine IgG and therefore receptors that bind Swine IgG Fc will not bind Swine IgG F(ab') ₂ molecules. This product possesses the F(ab') ₂ fragment, recognized by the two F(ab) fragments yielded from the digestion of the antibody below the disulfide bond hinge region.
Purity And Specificity	This product was prepared from normal serum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by pepsin digestion and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Swine IgG, anti-Swine IgG F(ab') ₂ and anti-Swine Serum. No reaction was observed against anti-Swine IgG F(c) or anti-Pepsin.
Assay Dilutions	User Optimized
Other Assays	User Optimized
Expiration	Expiration date is one (1) year from date of opening.
