

HEPES, ultra pure

Catalog No: 05288
Lot No: XXXXX
Cas No: 7365-45-9
Formula: C₈H₁₈N₂O₄S
MW: 238.31
Supplied as: solid
Stability: stable at room temperature

Background

HEPES (4-(2-hydroxyethyl)-1-piperazineethanesulfonic acid) is a zwitterionic organic chemical buffering agent. It is one of the twenty Good's buffers. HEPES is widely used in cell culture, largely because it is better at maintaining physiological pH despite changes in carbon dioxide concentration (produced by cellular respiration) when compared to bicarbonate buffers, which are also commonly used in cell culture.
