<b>Application Note</b>	This product has been assayed against 1.0 ug of Glucose-6-Phosphate Dehydrogenase [Leuconostoc mesenteroides] in a standard ELISA using Peroxidase conjugated Affinity Purified anti-Goat IgG [H&L] (Goat) code #611-1302 and (ABTS (2,2'-azino-bis-[3-ethylbenthiozoline-6-sulfonic acid]) code # ABTS-100 as a substrate for 30 minutes at room temperature. A working dilution of 1:2,000 to 1:8,000 of the reconstitution concentration is suggested for this product.
<b>Background</b>	Glucose-6-Phosphate Dehydrogenase catalyzes the oxidation of glucose 6-phosphate to 6-phosphogluconolactone. It can utilize either NADP+ or NAD+. This protein is involved in step 1 of the subpathway that synthesizes D-ribulose 5-phosphate from D-glucose 6-phosphate (oxidative stage).
<b>Purity And Specificity</b>	This product was prepared from monospecific antiserum by a delipidation and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-goat serum, purified and partially purified Glucose-6-Phosphate Dehydrogenase [Leuconostoc mesenteroides]. Cross reactivity against Glucose-6-Phosphate Dehydrogenase from other tissues and species may occur but have not been specifically determined.
<b>Assay Dilutions</b>	User Optimized
