

Anti-Mouse TNF (RABBIT) Antibody - 110-401-321

Code: 110-401-321

Size: 1 mL

Product Description: Anti-Mouse TNF (RABBIT) Antibody - 110-401-321

Concentration: 70 mg/mL by Refractometry

PhysicalState: Liquid (sterile filtered)

Label	Unconjugated
Host	Rabbit
Gene Name	TNFA
Species Reactivity	mouse
Buffer	None
Stabilizer	None
Preservative	None
Storage Condition	Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Synonyms	rabbit anti-Mouse TNF alpha Antibody, APC1 antibody, Cachectin antibody, DIF antibody, Differentiation inducing factor antibody, Macrophage cytotoxic factor antibody, MCF antibody, Necrosin antibody
Application Note	This antiserum against Mouse TNF α has been tested for use in neutralizations, ELISA, radioimmunoassay, immunoprecipitation, immunohistochemistry and immunoblotting. It recognizes the 17,000 MW TNF α . Reactivity in other immunoassays is unknown.
Background	TNF alpha Antibody detects TNF- α protein. TNF- α is a cytokine that binds to TNFRSF1A/TNFR1 and TNFRSF1B/TNFR2. It is mainly secreted by macrophages and can induce cell death of certain tumor cell lines. It is a potent pyrogen causing fever by direct action or by stimulation of interleukin-1 secretion and is implicated in the induction of cachexia. Under certain conditions it can stimulate cell proliferation and induce cell differentiation. Anti-TNF- α Antibody is ideal for investigators involved in Cell Signaling, Immunology and Signal Transduction research.
Purity And Specificity	This antiserum has been heated to 56°C for 30 minutes. The antiserum is directed against mature 17,000 MW mouse TNF α and is useful in determining its presence in various assays. The antibody does not recognize mouse TNF β (lymphotoxin). This antiserum will recognize the cell-bound precursor of TNF α as a 26,000 protein in immunoblots, particularly in denatured samples. This antibody is also useful for neutralization of mouse activity in bioassays. It does not neutralize the biological activity of lymphotoxin. For neutralization, it is recommended to incubate the sample with a 1:200 dilution of the antibody for at least 4 hours before being tested. A control of similarly diluted normal rabbit IgG is recommended.
Assay Dilutions	User Optimized
ELISA	1:1,000 - 1:5,000
Western Blot	1:500 - 1:2,000
Immunohistochemistry	1:100 - 1:500
Other Assays	User Optimized
Expiration	Expiration date is one (1) year from date of opening.
Immunogen	The whole rabbit serum was prepared by repeated immunizations with recombinant mouse TNF α produced in E.coli.
