

## Anti-HUMAN IgM mu chain (RABBIT) Antibody Fluorescein Conjugated - 209-4207

**Code:** 209-4207

**Size:** 20 mg

**Product Description:** Anti-HUMAN IgM mu chain (RABBIT) Antibody Fluorescein Conjugated - 209-4207

**Concentration:** 10.0 mg/mL by UV absorbance at 280 nm

**PhysicalState:** Lyophilized

<b>Label</b>	Fluorescein (FITC)
<b>Host</b>	Rabbit
<b>Emission Wavelength</b>	528
<b>Excitation Wavelength</b>	495
<b>Buffer</b>	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
<b>Reconstitution Volume</b>	2.0 mL
<b>Reconstitution Buffer</b>	Restore with deionized water (or equivalent)
<b>Stabilizer</b>	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
<b>Preservative</b>	0.01% (w/v) Sodium Azide
<b>Storage Condition</b>	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
<b>Synonyms</b>	rabbit anti-Human IgM (mu chain) Fluorescein Conjugated Antibody, rabbit anti-Human IgM mu chain FITC Conjugated Antibody, rabbit anti-Human IgM mu chain Antibody Fluorescein Conjugation, rabbit anti-Human IgM (mu chain) Antibody FITC Conjugation
<b>Application Note</b>	Anti-Human IgM (mu heavy chain) Fluorescein is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
<b>Background</b>	Anti-Human IgM (mu heavy chain) Fluorescein generated in rabbit detects specifically Human IgM mu heavy chain. Immunoglobulin M is the largest antibody isotype and the first to be secreted against an initial exposure to antigen. IgM is predominantly produced in the spleen. Formed from covalently linking 5 immunoglobulins together. Anti-Human IgM mu chain antibody is ideal for investigators in Immunology, Microbiology, and Cell Biology.
<b>Purity And Specificity</b>	This product is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-fluorescein, anti-Rabbit Serum, Human IgM and Human Serum. No reaction was observed against Human IgG.
<b>Assay Dilutions</b>	FLOW CYTOMETRY 1:500 - 1:2,500
<b>FLISA</b>	1:10,000 - 1:50,000
<b>IF Microscopy</b>	1:1,000 - 1:5,000
<b>Flow Cytometry</b>	1:500 - 1:2,500
<b>Other Assays</b>	FLOW CYTOMETRY 1:500 - 1:2,500
<b>Expiration</b>	Expiration date is one (1) year from date of opening.
<b>Immunogen</b>	Human IgM mu heavy chain
