Synonyms	Rabbit F(ab') ₂ anti-Chicken IgG Antibody peroxidase Conjugated, Rabbit F(ab') ₂ anti-Chicken IgG HRP conjugated antibody
Application Note	F(ab') ₂ Chicken IgG Antibody Peroxidase Conjugated is ideal for investigators who routinely perform flow cytometry, immunohistochemistry or IHC and other immunoassays.
Background	F(ab') ₂ Antibody was generated by enzymatic cleavage and subsequent separation from the Fc fragment. Because of their smaller size, F(ab') ₂ fragments offer several advantages over intact antibodies for use in certain immunochemical techniques and experimental applications. F(ab') ₂ fragments penetrate into tissue samples and show better antigen recognition and signal generation in IHC. F(ab') ₂ fragments lack the Fc region and therefore do not bind Fc receptors which effectively lowers background staining.
Purity And Specificity	This product is a F(ab') ₂ fragment of an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation, ion exchange chromatography and pepsin digestion followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Peroxidase, anti-Rabbit Serum, Chicken IgG and Chicken Serum. No reaction was observed against anti-Rabbit IgG F(c) or anti-Pepsin.
