

Dimethylsulfoxide (DMSO), ultra pure

Catalog No: 54686
Lot No: XXXXX
Cas No: 67-68-5
Formula: C₂H₆OS
MW: 78.13
Supplied as: liquid
Stability: store below 25°C
Retest date: 04/2028

Background

DMSO is a polar aprotic solvent that dissolves both polar and nonpolar compounds and is miscible in a wide range of organic solvents as well as water. DMSO is less toxic than other members of this class, such as dimethylformamide, dimethylacetamide, N-methyl-2-pyrrolidone, and HMPA. DMSO is also used in PCR to inhibit secondary structures in the DNA template or the DNA primers. In cell culture DMSO may also be used as a cryoprotectant, added to cell media to reduce ice formation and thereby prevent cell death during the freezing process.
