

Anti-Apolipoprotein A-II (GOAT) Antibody - 600-101-110

Code: 600-101-110

Size: 1 mg

Product Description: Anti-Apolipoprotein A-II (GOAT) Antibody - 600-101-110

Concentration: 1.0 mg/mL by UV absorbance at 280 nm

PhysicalState: Liquid (sterile filtered)

Label	Unconjugated
Host	Goat
Gene Name	APOA2
Species Reactivity	human
Buffer	0.125 M Sodium Borate, 0.075 M Sodium Chloride, 0.005 M EDTA, pH 8.0
Stabilizer	None
Preservative	0.01% (w/v) Sodium Azide
Storage Condition	Store vial at 4° C prior to opening. This product is stable at 4° C as an undiluted liquid. Dilute only prior to immediate use. For extended storage mix with an equal volume of glycerol, aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing.
Synonyms	goat anti-Apolipoprotein A-II antibody, Apo-All, ApoA-II, ApoAll antibody, APOA2 antibody, APO All antibody, Apolipoprotein All antibody, ApolipoproteinA II antibody, Proapolipoprotein A-II, ProapoA-II
Application Note	Anti-apoLipoprotein antibodies have been used for indirect trapping ELISA for quantitation of antigen in serum using a standard curve, for immunoprecipitation and for western blotting for highly sensitive qualitative analysis.
Background	This antibody is suitable for cardiovascular research.
Purity And Specificity	This product has been prepared by immunoaffinity chromatography using immobilized antigens followed by extensive cross-adsorption against other apolipoproteins and human serum proteins to remove any unwanted specificities. Typically less than 1% cross reactivity against other types of apolipoprotein was detected by ELISA against purified standards. This antibody reacts with human apolipoprotein A-II and has negligible cross-reactivity with Type A-I, B, C-I, C-II, C-III, E and J apolipoproteins. Specific cross reaction of anti-apolipoprotein antibodies with antigens from other species has not been determined. Non-specific cross reaction of anti-apolipoprotein antibodies with other human serum proteins is negligible.
Assay Dilutions	User Optimized
ELISA	1:5,000 - 1:10,000
Western Blot	1:5,000 - 1:10,000
Immunohistochemistry	1:50 - 1:200
Other Assays	User Optimized
Expiration	Expiration date is one (1) year from date of opening.
Immunogen	Apolipoprotein Type A-II was isolated from human plasma by density gradient centrifugation followed by HPLC purification.
