

## Anti-HA EPI TOPE TAG (RABBIT) Antibody DyLight™ 649 Conjugated - 600-443-384

**Code:** 600-443-384

**Size:** 100 µg

**Product Description:** Anti-HA EPI TOPE TAG (RABBIT) Antibody DyLight™ 649 Conjugated - 600-443-384

**Concentration:** 1.0 mg/mL by UV absorbance at 280 nm

**PhysicalState:** Lyophilized

<b>Label</b>	DyLight™ 649
<b>Host</b>	Rabbit
<b>Emission Wavelength</b>	674
<b>Excitation Wavelength</b>	646
<b>Buffer</b>	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
<b>Reconstitution Volume</b>	100 µL
<b>Reconstitution Buffer</b>	Restore with deionized water (or equivalent)
<b>Stabilizer</b>	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
<b>Preservative</b>	0.01% (w/v) Sodium Azide
<b>Storage Condition</b>	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
<b>Synonyms</b>	Rabbit Anti-HA Epitope Tag Antibody DyLight 649™ Conjugated, Rabbit Anti HA Epitope Tag Antibody DyLight 649™ Conjugated
<b>Application Note</b>	Anti-HA Epitope Tag DyLight 649 Antibody is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. The emission spectra for this DyLight™ conjugate match the principle output wavelengths of most common fluorescence instrumentation.
<b>Background</b>	Epitope tags are short peptide sequences that are easily recognized by tag-specific antibodies. Due to their small size, epitope tags do not affect the biochemical properties of the tagged protein. Most often, sequences encoding the epitope tag are included with the target DNA at the time of cloning to produce fusion proteins containing the epitope tag sequence. This allows Anti epitope tag antibodies to serve as universal detection reagents for any tag containing protein produced by recombinant means. This means that anti-epitope tag antibodies are a useful alternative to generating specific antibodies to identify, immunoprecipitate or immunoaffinity purify a recombinant protein. HA tag is frequently incorporated into recombinant proteins for a variety of purposes. An anti-HA antibody can then be used to detect the protein when doing studies with transfected cells.
<b>Purity And Specificity</b>	This affinity purified antibody is directed against the HA epitope tag and is useful in determining its presence in over expressed proteins in various assays. The antibody recognizes the HA epitope tag (Tyr-Pro-Tyr-Asp-Val-Pro-Asp-Tyr-Ala-Gly) fused to either the amino- or carboxy- termini of targeted proteins in transfected or transformed cells.
<b>Assay Dilutions</b>	User Optimized
<b>Western Blot</b>	1:10,000 - 1:25,000
<b>FLISA</b>	>1:20,000
<b>IF Microscopy</b>	>1:5,000
<b>Other Assays</b>	User Optimized
<b>Expiration</b>	Expiration date is one (1) year from date of opening.
<b>Immunogen</b>	This affinity purified antibody was prepared from whole rabbit serum produced by repeated immunizations with a synthetic peptide corresponding aa 114-122 (Y-P-Y-D-V-P-D-Y-A-G) of hemagglutinin influenza conjugated to KLH using maleimide.

**Images**

- 1 DyLight™ dyes can be used for two-color Western Blot detection with low background and high signal. Anti-tubulin was detected using a DyLight™ 549 conjugate. Anti-TNFα was detected using a DyLight™ 649 conjugate. The image was captured using the Typhoon™ 9410 Imaging System.

- 2 Western Blot of DyLight™ 649 conjugated Rabbit anti-HA antibody. Lane 1: Epitope Tag Protein Marker Lysate. Lane 2: none. Load: N/A. Primary antibody: none. Secondary antibody: DyLight™ 649 rabbit secondary antibody at 1:1,000 for 60 min at RT. Block: MB-070 for 30 min at RT. Predicted/Observed size: ~68 kDa/~68 kDa for HA Epitope Tag. Other band(s): none.
