

Anti-VSV-G EPITOPE TAG (RABBIT) Antibody DyLight™ 405 Conjugated - 600-446-386
Code: 600-446-386

Size: 100 µg

Product Description: Anti-VSV-G EPITOPE TAG (RABBIT) Antibody DyLight™ 405 Conjugated - 600-446-386

Concentration: 1.0 mg/mL by UV absorbance at 280 nm

PhysicalState: Lyophilized

Label	DyLight™ 405
Host	Rabbit
Emission Wavelength	420
Excitation Wavelength	400
Buffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Reconstitution Volume	100 µL
Reconstitution Buffer	Restore with deionized water (or equivalent)
Stabilizer	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
Preservative	0.01% (w/v) Sodium Azide
Storage Condition	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Synonyms	Rabbit Anti-VSV-G Epitope Tag DyLight 405™ Conjugated Antibody, Rabbit Anti VSV-G Epitope Tag DyLight 405™ Conjugated Antibody, Rabbit Anti-VSV-G Tag Antibody DyLight 405™ Conjugation
Application Note	This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. The emission spectra for this DyLight™ conjugate match the principle output wavelengths of most common fluorescence instrumentation.
Background	In order to improve expression levels, solubility, folding, purification and detection of recombinant proteins, a very common strategy is the fusion of peptides or proteins also known as "tags", to the target protein. Because these tags are entities with known sequences and well characterized physicochemical properties, they are an essential tool in molecular biology that facilitates expression and purification of recombinant proteins. Because fusion tags constitute themselves antigenic epitopes for which antibodies can be developed they particularly useful for specific detection of the target protein. This Anti-VSV-G Epitope Tag Antibody generated in rabbit is conjugated to DyLight™405.
Purity And Specificity	This affinity purified antibody is directed against the VSV-G epitope tag and is useful in determining its presence in over expressed proteins in various assays. The antibody recognizes the VSV-G epitope tag (Tyr-Thr-Asp-Ile-Glu-Met-Asn-Arg-Leu-Gly-Lys) fused to either the amino- or carboxy- termini of targeted proteins in transfected or transformed cells.
Assay Dilutions	User Optimized
Western Blot	1:10,000 - 1:25,000
FLISA	>1:20,000
IF Microscopy	>1:5,000
Other Assays	User Optimized
Expiration	Expiration date is one (1) year from date of opening.
Immunogen	This affinity purified antibody was prepared from whole rabbit serum produced by repeated immunizations with a synthetic peptide corresponding aa 501-511 (Y-T-D-I-E-M-N-R-L-G-K) of vesicular stomatitis virus glycoprotein (VSV-G) conjugated to KLH using maleimide.
