

## Anti-GUINEA PIG IgG F(c) (GOAT) Antibody Fluorescein Conjugated - 606-1203

**Code:** 606-1203

**Size:** 2 mg

**Product Description:** Anti-GUINEA PIG IgG F(c) (GOAT) Antibody Fluorescein Conjugated - 606-1203

**Concentration:** 2.0 mg/mL by UV absorbance at 280 nm

**PhysicalState:** Lyophilized

<b>Label</b>	Fluorescein (FITC)
<b>Host</b>	Goat
<b>Emission Wavelength</b>	528
<b>Excitation Wavelength</b>	495
<b>Buffer</b>	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
<b>Reconstitution Volume</b>	1.0 mL
<b>Reconstitution Buffer</b>	Restore with deionized water (or equivalent)
<b>Stabilizer</b>	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
<b>Preservative</b>	0.01% (w/v) Sodium Azide
<b>Storage Condition</b>	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
<b>Synonyms</b>	goat Anti-Guinea Pig IgG F(c) Antibody Fluorescein Conjugated, goat Anti-Guinea Pig IgG Fc Fragment Antibody FITC Conjugated
<b>Application Note</b>	This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
<b>Background</b>	Anti-Guinea Pig IgG F(c) Fluorescein generated in goat is a proteolytic fragment of immunoglobulin G (IgG) obtained by limited digestion with the enzyme papain under controlled conditions of temperature, time and pH. Receptors bind the Fc portion of Guinea Pig IgG and often this fragment is removed from immunoglobulins to minimize receptor binding and lower background reactivity.
<b>Purity And Specificity</b>	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Guinea Pig IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Fluorescein, anti-Goat Serum, Guinea Pig IgG, Guinea Pig IgG F(c) and Guinea Pig Serum. No reaction was observed against Guinea Pig IgG F(ab).
<b>Assay Dilutions</b>	FLOW CYTOMETRY 1:500 - 1:2,500
<b>FLISA</b>	1:10,000 - 1:50,000
<b>IF Microscopy</b>	1:1,000 - 1:5,000
<b>Flow Cytometry</b>	1:500 - 1:2,500
<b>Other Assays</b>	FLOW CYTOMETRY 1:500 - 1:2,500
<b>Expiration</b>	Expiration date is one (1) year from date of opening.
<b>Immunogen</b>	Guinea Pig IgG F(c) fragment
