Calreticulin Antibody

Rabbit Polyclonal

Antigen Affinity Purified

Catalog No. A301-129A

Lot No. A301-129A-1

Protein ID NP_004334.1

GeneID 811

APPLICATIONS	WB
SPECIES REACTIVITY	Human, Mouse
AMOUNT	100 µl
CONCENTRATION	200 µg/ml
STORAGE/SHELF LIFE	2 - 8° C / 1 year from date of receipt
PHYSICAL STATE	Liquid
BUFFER	Tris-buffered Saline containing 0.1% BSA and 0.09% Sodium Azide
ISOTYPE	IgG
ORIGIN	USA
PRODUCTION PROCEDURES	Antibody was affinity purified using an epitope specific to Calreticulin immobilized on solid support. The epitope recognized by A301-129A maps to a region between residue 1 and 50 of human calreticulin (Sicca syndrome antigen A) using the numbering given in entry NP_004334.1 (GeneID 811). Immunoglobulin concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.
APPLICATIONS	Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot	1:2,000 - 1:10,000
Immunoprecipitation	Not recommended. Use rabbit anti-Calreticulin antibody A301-130A.

APPLICATION NOTES	Western blot of lysates performed using standard western blot reagents and 4-20% SDS-PAGE.

Detection of human and mouse Calreticulin by western blot (h&m) and immunoprecipitation (h). *Samples:* Whole cell lysate from HeLa (5, 15 and 50 µg for WB; 1 mg for IP, 20% of IP loaded), HEK293T (T; 50 µg) and mouse NIH 3T3 (M; 50 µg) cells. *Antibodies:* Affinity purified rabbit anti-Calreticulin antibody A301-129A used for WB at 0.04 µg/ml (A) and 0.1 µg/ml (B). Calreticulin was immunoprecipitated by rabbit anti-Calreticulin antibody A301-130A, which recognizes a downstream epitope. *Detection:* Chemiluminescence with exposure times of 30 seconds (A and B).
