

Detection of human ZNF639 by western blot of immunoprecipitates. *Samples:* Whole cell lysate (1 mg for IP, 20% of IP loaded) from HeLa cells. *Antibodies:* Affinity purified rabbit anti-ZNF639 antibody A302-401A used for IP at 10 μ g/mg lysate. ZNF639 was also immunoprecipitated by rabbit anti-ZNF639 antibody A302-400A, which recognizes an upstream epitope. For blotting immunoprecipitated ZNF639, A302-400A was used at 1 μ g/ml. *Detection:* Chemiluminescence with an exposure time of 10 seconds.
