

# TAB2 Antibody

Rabbit Polyclonal

Antigen Affinity Purified

Protein ID NP\_055908.1

Catalog No. A302-758A

GeneID 23118

Lot No. A302-758A-1

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                        |

| BUFFER                | Tris-citrate/phosphate buffer, pH 7 to 8 containing 0.09% Sodium Azide                                                                                                                                                                                                                                                                                                                                                 |
| ISOTYPE               | IgG                                                                                                                                                                                                                                                                                                                                                                                                                    |
| ORIGIN                | USA                                                                                                                                                                                                                                                                                                                                                                                                                    |
| PRODUCTION PROCEDURES | <p>Antibody was affinity purified using an epitope specific to TAB2 immobilized on solid support.</p> <p>The epitope recognized by A302-758A maps to a region between residue 300 and 350 of human TAK1-Binding Protein 2 using the numbering given in entry NP_055908.1 (GeneID 23118).</p> <p>Antibody concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.</p> |
| APPLICATIONS          | <p>Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.</p> <p>Western Blot                      Not recommended. Use rabbit anti-TAB2 antibody A302-759A.</p> <p>Immunoprecipitation            2 – 5 µg/mg lysate</p>                                                                     |
| APPLICATION NOTES     | Western blot of immunoprecipitates performed using Normal Pig Serum (Cat. No. S100-020), Goat anti-Rabbit Light Chain HRP Conjugate (Cat. No. A120-113P) and 4-8% SDS-PAGE (link to IP-western blot protocol in Additional Info section below).                                                                                                                                                                        |

**Detection of human TAB2 by western blot of immunoprecipitates.** *Samples:* Whole cell lysate (1 mg for IP, 20% of IP loaded) from HeLa cells. *Antibodies:* Affinity purified rabbit anti-TAB2 antibody A302-758A used for IP at 3 µg/mg lysate. TAB2 was also immunoprecipitated by rabbit anti-TAB2 antibody A302-759A, which recognizes a downstream epitope. For blotting immunoprecipitated TAB2, A302-759A was used at 1 µg/ml. *Detection:* Chemiluminescence with an exposure time of 30 seconds.
