

Detection of human and mouse Transaldolase by western blot. *Samples:* Whole cell lysate (50 µg) from HeLa, HEK293T, Jurkat, mouse TCMK-1, and mouse NIH 3T3 cells. *Antibodies:* Affinity purified rabbit anti-Transaldolase antibody A304-326A (lot A304-326A-1) used for WB at 0.4 µg/ml. *Detection:* Chemiluminescence with an exposure time of 3 minutes.

Detection of human Transaldolase by western blot of immunoprecipitates. *Samples:* Whole cell lysate (0.5 or 1.0 mg per IP reaction; 20% of IP loaded) from HeLa cells. *Antibodies:* Affinity purified rabbit anti-Transaldolase antibody A304-326A (lot A304-326A-1) used for IP at 6 µg per reaction. Transaldolase was also immunoprecipitated by rabbit anti-Transaldolase antibody A304-325A. For blotting immunoprecipitated Transaldolase, A304-326A was used at 1 µg/ml. *Detection:* Chemiluminescence with an exposure time of 30 seconds.
