

Detection of human Oxytocinase by western blot.

Samples: Whole cell lysate (50 µg) prepared using NETN buffer from HeLa, HEK293T, and Jurkat cells. **Antibodies:** Affinity purified rabbit anti-Oxytocinase antibody A304-363A (lot A304-363A-1) used for WB at 0.1 µg/ml. **Detection:** Chemiluminescence with an exposure time of 3 minutes.

Detection of human Oxytocinase by western blot of immunoprecipitates.

Samples: Whole cell lysate (0.5 or 1.0 mg per IP reaction; 20% of IP loaded) prepared using NETN buffer from Jurkat cells. **Antibodies:** Affinity purified rabbit anti-Oxytocinase antibody A304-363A (lot A304-363A-1) used for IP at 6 µg per reaction. Oxytocinase was also immunoprecipitated by rabbit anti-Oxytocinase antibody BL16227. For blotting immunoprecipitated Oxytocinase, A304-363A was used at 1 µg/ml. **Detection:** Chemiluminescence with an exposure time of 30 seconds.
