

Detection of human and mouse Striatin by western blot.
Samples: Whole cell lysate (50 µg) from HeLa, HEK293T, Jurkat, mouse TCMK-1, and mouse NIH 3T3 cells prepared using NETN lysis buffer. *Antibodies:* Affinity purified rabbit anti-Striatin antibody A304-537A (lot A304-537A-1) used for WB at 0.1 µg/ml. *Detection:* Chemiluminescence with an exposure time of 30 seconds.

Detection of human Striatin by western blot of immunoprecipitates. *Samples:* Whole cell lysate (0.5 or 1.0 mg per IP reaction; 20% of IP loaded) from 293T cells prepared using NETN lysis buffer. *Antibodies:* Affinity purified rabbit anti-Striatin antibody A304-537A (lot A304-537A-1) used for IP at 6 µg per reaction. Striatin was also immunoprecipitated by rabbit anti-Striatin antibody BL17187. For blotting immunoprecipitated Striatin, A304-537A was used at 1 µg/ml. *Detection:* Chemiluminescence with an exposure time of 30 seconds.
