

STX5 Antibody

Rabbit Polyclonal

Antigen Affinity Purified

Protein ID Q13190.2

Catalog No. A305-382A

GeneID 6811

Lot No. A305-382A-1

APPLICATIONS	IP
SPECIES REACTIVITY	Human
PRESUMED REACTIVITY	Based on 100% sequence identity, this antibody is predicted to react with Mouse, Rat and Bovine
AMOUNT	100 µl
CONCENTRATION	1000 µg/ml
STORAGE/SHELF LIFE	2 - 8° C / 1 year from date of receipt
PHYSICAL STATE	Liquid
BUFFER	Tris-citrate/phosphate buffer, pH 7 to 8 containing 0.09% Sodium Azide
ISOTYPE	IgG
ORIGIN	USA
PRODUCTION PROCEDURES	Antibody was affinity purified using an epitope specific to STX5 immobilized on solid support.

The epitope recognized by A305-382A maps to a region between residue 1 to 50 of human Syntaxin-5 using the numbering given in entry Q13190.2 (GeneID 6811).

Antibody concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.

APPLICATIONS Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot Not recommended. A305-382A has not performed satisfactorily when used for WB of STX5 in crude preparations (e.g. whole cell lysate). This antibody can be used for WB of enriched (e.g. immunoprecipitated) sources of STX5.

Immunoprecipitation 2 - 10 µg/mg lysate

APPLICATION NOTES Western blot of immunoprecipitates performed using Normal Pig Serum (Cat. No. S100-020), Goat anti-Rabbit Light Chain HRP Conjugate (Cat. No. A120-113P) and 4-20% SDS-PAGE (link to IP-western blot protocol in Additional Info section below).

Detection of human STX5 by western blot of immunoprecipitates. *Samples:* Whole cell lysate (0.5 or 1.0 mg per IP reaction; 20% of IP loaded) from HeLa cells prepared using NETN lysis buffer. *Antibodies:* Affinity purified rabbit anti-STX5 antibody A305-382A (lot A305-382A-1) used for IP at 6 μ g per reaction. STX5 was also immunoprecipitated by rabbit anti-STX5 antibody BL21355. For blotting immunoprecipitated STX5, A305-382A was used at 1 μ g/ml. *Detection:* Chemiluminescence with an exposure time of 30 seconds.
