## Human IgG-Fc Fragment Antibody

Human IgG-Fc Fragment Antibody		
F(ab')2 Goat Polycl		
Antigen Affinity Pu		
5		
Lot No. A8	0-248A-5	IC
APPLICATIONS	WB, IHC, ICC, ELISA	
SPECIES REACTIVITY	Human. Minimum reactivity to mouse and rat	
AMOUNT	1 ml	
CONCENTRATION	0.5 mg/ml	
STORAGE/SHELF LIF	E 2 - 8° C / 1 year from date of receipt	
PHYSICAL STATE	Liquid	
BUFFER	Phosphate Buffered Saline (PBS) containing 0.09% Sodium Azide	
ISOTYPE	IgG	
ORIGIN	USA	
PRODUCTION PROCEDURES	Antiserum was solid phase adsorbed to ensure class specificity. Antiserum was cross adsorbed using mouse and rat immunosorbents to remove cross reactive antibodies. The antibody to human IgG was isolated by affinity chromatography using antigen coupled to agarose beads. F(ab')2 fragments were generated using a pepsin digestion. Fc fragments and whole IgG molecules have been removed.	
	Antibody concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.	
	By immunoelectrophoresis and ELISA this antibody reacts specifically with human IgG. Cross reactivity with IgA and IgM is negligible. No antibody was detected against non- immunoglobulin serum proteins. Less than 1% cross reactivity to mouse and rat IgG was detected. This antibody may cross react with IgG from other species.	
APPLICATIONS	Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.	
	Western Blot 1:1,000 – 1:20,000	
	Immunohistochemistry 1:200 – 1:2,000	
	Immunocytochemistry 1:200 – 1:2,000	
	ELISA 1:1,000 – 1:20,000; for coating plates 1:50 – 1:250
