Mouse IgG-heavy and light chain cross-adsorbed Antibody

Donkey Polyclonal

Antigen Affinity Purified

Catalog No. A90-337A Lot No. A90-337A-5

APPLICATIONS WB, IHC, ICC, ELISA

SPECIES REACTIVITY Mouse, Minimum reactivity to boyine, chicken, goat, human, rabbit, rat and sheep

ISOTYPE IaG

AMOUNT 1 ml at 0.5 mg/ml

2 - 8° C / 1 year from date of receipt STORAGE/SHELF LIFE

PHYSICAL STATE Liquid

BUFFFR Phosphate Buffered Saline (PBS) containing 0.09% Sodium Azide

ORIGIN USA

PRODUCTION

Antiserum was cross adsorbed using bovine, chicken, goat, human, rabbit, rat and sheep **PROCEDURES** immunosorbents to remove cross reactive antibodies. The antibody to mouse IgG was isolated by

affinity chromatography using antigen coupled to agarose beads.

Antibody concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4

equals 1.0 mg of IgG.

By immunoelectrophoresis and ELISA this antibody reacts specifically with mouse IgG and with light chains common to other mouse immunoglobulins. No antibody was detected against nonimmunoglobulin serum proteins. Less than 2% cross reactivity to bovine, chicken, goat, human, rabbit, rat and sheep IgG was detected. This antibody may cross react with IgG from other

species.

APPLICATIONS Centrifuge tube to remove product from lid. Optimal working dilutions should be determined

experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot 1:1,000 - 1:20,000

Immunohistochemistry 1:200 - 1:2,000 Immunocytochemistry 1:200 - 1:2,000

ELISA 1:1,000 - 1:20,000; for coating plates 1:50 - 1:250

APPLICATION NOTES Not all listed applications have been specifically tested by our laboratory.
