

Mouse TrkB AccuSignal ELISA Kit - KOA0510

Code: KOA0510

Size: 1 Kit

Product Description: Mouse TrkB AccuSignal ELISA Kit - KOA0510

PhysicalState:

Label	Unconjugated
Gene Name	NTRK2
Species Reactivity	Mouse
Storage Condition	Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.
Synonyms	BDNF tropomyosine receptor kinase B, BDNF/NT-3 growth factors receptor, GP145-TrkB, Neurotrophic tyrosine kinase receptor type 2, Ntrk2, NTRK2_HUMAN, Trk-B, TRKB, TrkB tyrosine kinase, Tyrosine kinase receptor B
Application Note	Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 6000pg/ml, 3000pg/ml, 1500pg/ml, 750pg/ml, 419pg/ml, 187.5pg/ml, 93.8pg/ml mouse trkB standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of mouse cell culture supernates, cell lysates or tissue lysates to each empty well. We recommend that each mouse trkB standard solution and each sample is measured in duplicate.
Background	TrkB receptor also known as TrkB tyrosine kinase or BDNF/NT-3 growth factors receptor or neurotrophic tyrosine kinase, receptor, type 2 is a protein that in humans is encoded by the NTRK2 gene.[1] TrkB is the high affinity catalytic receptor for several "neurotrophins", which are small protein growth factors that induce the survival and differentiation of distinct cell populations. The TrkB receptor is part of the large family of receptor tyrosine kinases. A "tyrosine kinase" is an enzyme which is capable of adding a phosphate group to certain tyrosines on target proteins, or "substrates". Soppet et al. [2] demonstrated that the gp145 gene product of the TRKB gene is rapidly phosphorylated on tyrosine residues upon exposure to BDNF and NTF3. The standard product used in this kit is recombinant TrkB, a 49.5KDa glycoprotein, C32—H439.
Purity And Specificity	Natural and recombinant mouse TrkB. There is no detectable cross-reactivity with other relevant proteins.
ELISA	93.8pg/ml-6000pg/ml
Expiration	See kit insert for complete instructions.
Immunogen	Expression system for standard: NSO; Immunogen sequence: C32-H429
