

Mouse S100A9 AccuSignal ELISA Kit - KOA0662
Code: KOA0662

Size: 1 Kit

Product Description: Mouse S100A9 AccuSignal ELISA Kit - KOA0662

PhysicalState:

Label	Unconjugated
Gene Name	S100A9
Species Reactivity	Mouse
Storage Condition	Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.
Synonyms	Leukocyte L1 complex heavy chain, CAGB, Calgranulin B, Calprotectin L1H subunit, CFAG, CGLB, Cystic fibrosis antigen, Cystic fibrosis antigen B, L1AG, Leukocyte L1 complex heavy chain, LIAG, MAC 387, MAC387, MIF, Migration inhibitory factor related protein 14, Migration inhibitory factor-related protein 14, MRP14, Myeloid-related protein 14, NIF, P14, S100 A9, S100 calcium binding protein A9, S100 calcium binding protein A9 calgranulin B, S100 calcium-binding protein A9, S10A9_HUMAN
Application Note	Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 2000pg/ml, 1000pg/ml, 500pg/ml, 250pg/ml, 125pg/ml, 62.5pg/ml, 31.2pg/ml mouse S100A9 standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of mouse cell culture supernates, serum or plasma (heparin, EDTA) to each empty well. It is recommended that each mouse S100A9 standard solution and each sample be measured in duplicate.
Background	Protein S100A9 also known as migration inhibitory factor-related protein 14 (MRP-14) or calgranulin-B is a protein that is encoded by the S100A9 gene. S100A9 is a member of the S100 family of proteins containing 2 EF hand calcium-binding motifs. It is mapped to Chromosome 3 in mouse. S100 proteins are localized in the cytoplasm and/or nucleus of a wide range of cells, and involved in the regulation of a number of cellular processes such as cell cycle progression and differentiation. This protein may function in the inhibition of casein kinase. S100A9 complexes with S100A8, another member of the S100 family of calcium-modulated proteins regulates myeloid cell function by binding to Toll-like receptor-4 (TLR-4) and the receptor for advanced glycation end products.
Purity And Specificity	Natural and recombinant mouse S100A9. There is no detectable cross-reactivity with other relevant proteins.
ELISA	31.2pg/ml-2000pg/ml
Expiration	See kit insert for complete instructions.
Immunogen	Expression system for standard: E.coli; Immunogen sequence: A2-K113
Anti-Coagulant	Heparin Sodium
