

Human S100A12 AccuSignal ELISA Kit - KOA0672

Code: KOA0672

Size: 1 Kit

Product Description: Human S100A12 AccuSignal ELISA Kit - KOA0672

Concentration: 1 Kit

PhysicalState:

Label	Unconjugated
Gene Name	S100A12
Species Reactivity	Human
Storage Condition	Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.
Synonyms	CAAF1, CAGC, Calcitermin, Calcium binding protein in amniotic fluid, Calcium-binding protein in amniotic fluid 1, Calgranulin C, Calgranulin related protein, Calgranulin-C, CGRP, EN RAGE, EN-RAGE, ENRAGE, Extracellular newly identified RAGE-binding protein, migration inhibitory factor-related protein 6, MRP6, Neutrophil S100 protein, p6, Protein S100 A12, S100 calcium binding protein A12, S100 calcium-binding protein A12 (calgranulin C), S100 calcium-binding protein A12, S10AC_HUMAN
Application Note	Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 20,000pg/ml, 10,000pg/ml, 5000pg/ml, 2500pg/ml, 1250pg/ml, 625pg/ml, 312pg/ml human S100A12 standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of human cell culture supernates, serum or plasma(heparin, EDTA) to each empty well. It is recommended that each human S100A12 standard solution and each sample be measured in duplicate.
Background	S100 calcium-binding protein A12 (S100A12) is a protein that in humans is encoded by the S100A12 gene. It is also known as calgranulin C. By direct R-banding FISH, the S100A12 gene is mapped to chromosome 1q21.2-q22. The protein encoded by this gene is a member of the S100 family of proteins containing 2 EF-hand calcium-binding motifs. S100 proteins are localized in the cytoplasm and/or nucleus of a wide range of cells, and involved in the regulation of a number of cellular processes such as cell cycle progression and differentiation. S100 genes include at least 13 members which are located as a cluster on chromosome 1q21. And this protein is proposed to be involved in specific calcium-dependent signal transduction pathways and its regulatory effect on cytoskeletal components may modulate various neutrophil activities.
Purity And Specificity	Natural and recombinant human S100A12. There is no detectable cross-reactivity with other relevant proteins.
ELISA	312pg/ml-20,000pg/ml
Expiration	See kit insert for complete instructions.
Immunogen	Expression system for standard: E.coli; Immunogen sequence: M1-E92
Anti-Coagulant	Heparin Sodium
