

Mouse CD48 AccuSignal ELISA Kit - KOA0787
Code: KOA0787

Size: 1 Kit

Product Description: Mouse CD48 AccuSignal ELISA Kit - KOA0787

PhysicalState:

Label	Unconjugated
Gene Name	CD48
Species Reactivity	Mouse
Storage Condition	Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.
Synonyms	Antigen CD48, B cell membrane protein, B lymphocyte activation marker BLAST 1, B lymphocyte activation marker BLAST 1, B-cell activation marker, B-lymphocyte activation marker BLAST-1, BCM 1 surface antigen, BCM1, BCM1 surface antigen, BLAST, BLAST1, CD48 antigen (B cell membrane protein), CD48 antigen, CD48 molecule, CD48 protein, CD48_HUMAN, hCD48, Leucocyte antigen MEM 102 mCD48, MEM102, Signaling lymphocytic activation molecule 2, SLAM family member 2, SLAMF 2, SLAMF2
Application Note	Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 4000pg/ml, 2000pg/ml, 1000pg/ml, 500pg/ml, 250pg/ml, 125pg/ml, 62.5pg/ml mouse CD48 standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of mouse cell culture supernates, serum or plasma (heparin, EDTA) to each empty well. It is recommended that each mouse CD48 standard solution and each sample be measured in duplicate.
Background	CD48 antigen (Cluster of Differentiation 48), also known as BLAST-1 or SLAMF2, is a protein that in humans is encoded by the CD48 gene. CD48 is a member of the CD2 subfamily of the immunoglobulin superfamily (IgSF) which includes SLAM (signaling lymphocyte activation molecules) proteins, such as CD84, CD150, CD229 and CD244. It is mapped to 1q23.3. CD48 is found on the surface of lymphocytes and other immune cells, dendritic cells and endothelial cells, and participates in activation and differentiation pathways in these cells. The encoded protein does not have a transmembrane domain, however, but is held at the cell surface by a GPI anchor via a C-terminal domain which maybe cleaved to yield a soluble form of the receptor.
Purity And Specificity	Natural and recombinant mouse CD48. There is no detectable cross-reactivity with other relevant proteins.
ELISA	62.5pg/ml-4000pg/ml
Expiration	See kit insert for complete instructions.
Immunogen	Expression system for standard: NSO; Immunogen sequence: F23-S217
Anti-Coagulant	Heparin Sodium
