

Rat IL-3 AccuSignal ELISA Kit - KOA0795
Code: KOA0795

Size: 1 Kit

Product Description: Rat IL-3 AccuSignal ELISA Kit - KOA0795

PhysicalState:

Label	Unconjugated
Gene Name	IL3
Species Reactivity	Rat
Storage Condition	Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.
Synonyms	Burst promoting activity, Colony stimulating factor multiple, Eosinophil colony stimulating factor, Hematopoietic growth factor, IL 3, IL-3, IL3, IL3_HUMAN, Interleukin 3, Interleukin-3, Mast cell growth factor, MCGF, Multi CSF, Multilineage colony stimulating factor, Multipotential colony stimulating factor, Multipotential colony-stimulating factor, P cell stimulating factor, P-cell-stimulating factor, Thy1 inducing factor
Application Note	Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 500pg/ml, 250pg/ml, 125pg/ml, 62.5pg/ml, 31.3pg/ml, 15.6pg/ml, 7.8pg/ml rat IL-3 standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of rat cell culture supernates or serum to each empty well. We recommend that each rat IL-3 standard solution and each sample is measured in duplicate.
Background	The gene IL-3 encodes interleukin 3, a hematopoietic colony-stimulating factor(CSF) that is capable of supporting the proliferation of a broad range of hematopoietic cell types. Interleukin-3(IL-3), a protein of 140 amino acids, is chemically synthesized by means of an automated peptide synthesizer and is shown to have the biological activities attributed to native IL-3. The cDNA sequence for murine interleukin-3, one of the colony stimulating factors that regulate haematopoiesis, codes for a polypeptide of 166 amino acids including a putative signal peptide. The mouse IL 3 gene is located on chromosome 11. The human gene encoding IL 3 is tandemly arrayed on the long arm of chromosome 5.5 The standard product used in this kit is recombinant human IL-3, consisting of 133 amino acids with the molecular mass of 15KDa.
Purity And Specificity	Natural and recombinant rat IL-3. There is no detectable cross-reactivity with other relevant proteins.
ELISA	7.8pg/ml-500pg/ml
Expiration	See kit insert for complete instructions.
Immunogen	Expression system for standard: E.coli; Immunogen sequence: I27-C169
