Solubility

Pricing and Availability

Bulk quantities available upon request

Product ID	Size
A146841	25-250

Store Temp 4° C

Ship Temp Blue Ice

Description Advanced Calcein AM Cell Viability Kit combines Calcein AM with 7-Aminoactinomycin D (7-AAD) to allow for easy and simultaneous labeling of live, membrane compromised, and dead cells within a single sample. Calcein AM is used to detect live cells, fluorescing green, while 7-AAD is used to detect necrotic or late stage apoptotic cells, fluorescing red. Samples can be analyzed using a flow cytometer or fluorescent microscope.
