Product Information

Product ID A5280

CAS No. 23025-68-5

Chemical Name

Synonym

Formula C₄₀H₅₄N₈O₈

Formula Wt. 774.93

Melting Point

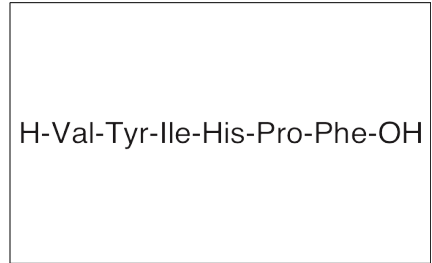

Purity ≥95%

Solubility Soluble in water.

Store Temp -20° C

Ship Temp Ambient

Description Angiotensin II (AT II) is a peptide produced from AT I by angiotensin-converting-enzyme (ACE). AT II binds the AT II type 1 (AT1) receptor, stimulating GPCRs in vascular smooth muscle cells and increasing intracellular Ca²⁺ levels; this results in contraction and vasoconstriction, increasing blood pressure. AT II also acts at the Na⁺/H⁺ exchanger in the proximal tubules of the kidney. Here, AT II increases reabsorption of Na⁺ and HCO₃⁻ and excretion of H⁺, increasing blood volume and pH and further increasing blood pressure.

Bulk quantities available upon request

Product ID	Size
A5280	5 mg
A5280	10 mg
A5280	25 mg
