Product Information

Product ID E5216

CAS No. 59887-17-1

Chemical Name

Synonym β -Lipotropin (61-91), camel.

Formula $C_{155}H_{250}N_{42}O_{44}S$

Formula Wt. 3438.04

Melting Point

Purity $\geq 95\%$

Solubility Insoluble in water. Soluble
in acetonitrile.

Store Temp $-20^{\circ}C$

Ship Temp Ambient

Description

β -Endorphin is an endogenous opioid peptide that acts as an agonist at μ -opioid receptors (μ ORs) and exhibits immunomodulatory, neuromodulatory, antidepressant, and antinociceptive/analgesic activities. In vivo, β -endorphin increases levels of B-cells and production of antibodies as well as secretion of IL-4 and proliferation of spleenocytes, shifting the immune response toward Th2-specific mediators. This peptide, like other endogenous opioids, plays a significant role in reward and reinforcement signaling, especially in brain regions such as the ventral tegmental area (VTA) and nucleus accumbens (NAcc). β -Endorphin release is induced during exercise and shows antidepressant activity in clinical studies.

H-Tyr-Gly-Gly-Phe-Met-Thr-
Ser-Glu-Lys-Ser-Gln-Thr-
Pro-Leu-Val-Thr-Leu-Phe-
Lys-Asn-Ala-Ile-Ile-Lys-Asn-
Ala-His-Lys-Lys-Gly-Gln-OH

Bulk quantities available upon request

Product ID	Size
E5216	1 mg
E5216	2 mg
E5216	5 mg
