

Product Information

Product ID H9712

CAS No. 174592-47-3

Chemical Name

Synonym

Formula $C_{26}H_{29}NO_2$

Formula Wt. 387.51

Melting Point

Purity $\geq 97\%$

Solubility

Store Temp $-20^{\circ}C$

Ship Temp Ambient

Description (E)-4-Hydroxytamoxifen is the less active isomer of 4-hydroxytamoxifen. 4-Hydroxytamoxifen is the active metabolite of tamoxifen, a selective estrogen receptor modulator (SERM) that acts as an agonist or antagonist in various tissues. 4-Hydroxytamoxifen exhibits anticancer chemotherapeutic activity, inducing autophagy and vacuole formation as well as KRAS degradation in various cancer cell lines. In cardiac myocytes, 4-hydroxytamoxifen decreases Ca^{2+} amplitude, slowing relaxation and decreasing contractility.

Bulk quantities available upon request

Product ID	Size
H9712	5 mg
H9712	10 mg
H9712	25 mg
