Product Information

Product ID I527211

CAS No. 1310746-10-1

Chemical Name

Synonym NVP-BGJ398 Phosphate, BGJ-398 phosphate

Formula $C_{26}H_{34}Cl_2N_7O_7P$

Formula Wt. 658.5

Melting Point

Purity $\geq 98\%$

Solubility

Store Temp $-20^{\circ}C$

Ship Temp Ambient

Description NVP-BGJ398 is an inhibitor of FGFR that exhibits anticancer chemotherapeutic and antirachitic activities. NVP-BGJ398 inhibits cell viability in colon cancer cells and prevents progression and tumor formation in animal models of malignant rhabdoid tumors. In endometrial cancer cells, NVP-BGJ398 induces cell cycle arrest and inhibits growth; in vivo, it also inhibits tumor growth. NVP-BGJ398 inhibits aberrant FGFR signaling in animal models of rickets disease, normalizing bone growth and mineralization.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size
I527211	5 mg
I527211	25 mg
I527211	50 mg
