Product Information

Product ID L302690

CAS No. 33515-09-2

Chemical Name pEHSYGLRPG-NH₂

Synonym Gonadorelin, Gonadorelin acetate salt, Luliberin, GnRH, LHRH, human

Formula

Formula Wt. 1182.31

Melting Point

Purity ≥95%

Solubility

Pyr-His-Trp-Ser-Tyr-Gly-Leu-Arg-Pro-Gly-NH₂ acetate salt

Bulk quantities available upon request

Product ID	Size
------------	------

L302690	25 mg
---------	-------

L302690	100 mg
---------	--------

Store Temp -20°C

Ship Temp Ambient

Description Luteinizing hormone-releasing hormone (LHRH or Gonadotropin-releasing hormone [GnRH]) is an endogenous peptide hormone that binds the GnRH receptor, stimulating secretion of reproductive hormones (such as luteinizing hormone [LH] and follicle-stimulating hormone [FSH]) from the pituitary gland. Analogs of GnRH are clinically used to treat hormone-dependent diseases such as prostate and breast cancer, hyperplasia, and endometriosis.
