Product Information

Product ID	N1993				
CAS No.					
Chemical Name		1	H-Arg-P	ro-Tyr-Ile-Leu-OH	
Synonym					
Formula	C ₃₂ H ₅₂ N ₈ O ₇				
Formula Wt.	660.82				
Melting Point			Bulk quanitites available upon request		
Purity	≥95% Soluble in water.	Pi	roduct ID	Size	
Solubility		N	1993	5 mg	
		N	1993	10 mg	
		N ⁻	1993	25 mg	
Store Temp	-20°C				
Ship Temp	Ambient				

Description Neurotensin is a tridecapeptide that exhibits antinociceptive, pro-inflammatory, and gastrointestinal motility modulating activities. Neurotensin induces contractions in smooth muscle cells, playing a role in regulating digestive activity in vitro and in vivo. Additionally, neurotensin induces intracellular Ca2+ release, activating non-selective cation channels and altering pacemaker currents involved in gastrointestinal and colonic motility. In animal models, neurotensin displays sympatho-inhibitory activity, decreases blood pressure and heart rate. Neurotensin exerts its actions through activation of neurotensin receptors; activation of these receptors also stimulates orexin neurons, suggesting a role for neurotensin in mediation of reward, feeding, and wakefulness.
