Product Information

Product ID N582686

CAS No. 69815-49-2

Chemical Name L-(-)-Norepinephrine-(+)-bitartrate

Synonym L-(-)-Norepinephrine bitartrate, Levarterenol bitartrate, Noradrenaline bitartrate, R(-)-4-(2-Amino-1-hydroxyethyl)-1,2-benzenediol-(+)-tartrate

Formula $C_8H_{11}NO_3 \cdot C_4H_6O_6$

Formula Wt. 319.26

Melting Point

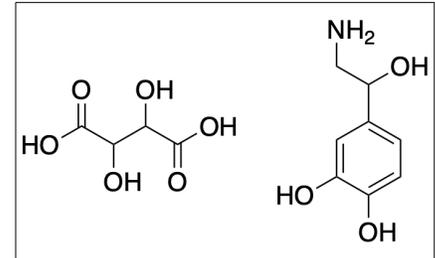

Purity $\geq 98\%$

Solubility Soluble in water-48 mg/mL.

Store Temp 4°C

Ship Temp Ambient

Description Norepinephrine is a hormone and neurotransmitter that modulates sympathetic nervous system activity and plays a role in modulating reward, reinforcement, feeding, and other behaviors. Norepinephrine exhibits vasoconstrictive, pro-angiogenic, and thermoregulatory activities. Norepinephrine is clinically used to treat cardiac arrest, severe hypotension, and shock. This compound acts as an agonist at α - and β -adrenergic receptors, inducing vascular vasoconstriction, decreasing blood flow, and increasing blood pressure. In vitro, norepinephrine increases expression of VEGF and stimulates choroidal neovascularization. This compound also decreases code body temperature.

Pricing and Availability

Bulk quantities available upon request

Product ID	Size
N582686	100 mg
N582686	250 mg
N582686	1 g
