Product Information

Product ID P0007

CAS No. 136134-68-4

Chemical Name

Synonym PACAP (6-27)

Formula $C_{121}H_{193}N_{33}O_{31}S$

Formula Wt. 2638.1

Melting Point

Purity $\geq 95\%$

Solubility

Store Temp $-20^{\circ}C$

Ship Temp Ambient

Description

Pituitary adenylate cyclase-activating polypeptide (PACAP) is an endogenous peptide that stimulates cAMP production in the anterior pituitary. PACAP and PACAP-related peptide (PRP) regulate immune function and display increases in expression when hosts are challenged with bacterial pathogens. PACAP and PRP also control expression of reproductive hormones such as follicle-stimulating hormone (FSH) and luteinizing hormone (LH). Additionally, PACAP and PRP bind the PAC1 receptor and VPAC1/2 receptors. PACAP itself inhibits K^{+} amplitude of delayed rectifier K^{+} channels, exhibiting anti-apoptotic activity in cerebellar granule cells.

H-Phe-Thr-Asp-Ser-Tyr-Ser-Arg-Tyr-Arg-Lys-Gln-Met-Ala-Val-Lys-Lys-Tyr-Leu-Ala-Ala-Val-Leu-NH₂

Bulk quantities available upon request

Product ID	Size
P0007	0.5 mg
P0007	1 mg
P0007	2.5 mg
