## Product Information

Product ID S5745

CAS No. 59481-23-1

Chemical Name

Synonym

Formula  $C_{82}H_{108}N_{18}O_{20}S_2$

Formula Wt. 1730.01

Melting Point

Purity  $\geq 95\%$

Solubility

Store Temp  $-20^{\circ}C$

Ship Temp Ambient

**Description** Somatostatin is an endogenous neuropeptide hormone found in the brain and pancreas. Somatostatin binds several isoforms of the somatostatin receptor, exhibiting anxiolytic, antiepileptic/anticonvulsant, and anorexigenic activities. In vivo, somatostatin improves performance in the light/dark avoidance test. Somatostatin also suppresses seizures and prevents the generation of seizures, potentially through modulation of GABA signaling. Somatostatin induces cell death under hypoxic/ischemic conditions. In tumor cells, somatostatin displays pro-apoptotic properties, potentially involving the inhibition of PI3K/Akt signaling. Somatostatin also limits food intake and inhibits secretion of insulin and glucagon through alteration of G $\beta$  signaling and P/Q-type N-type, and L-type voltage-gated Ca $^{2+}$  channel signaling.

H-Tyr-Gly-Cys-Lys-Asn-Phe-  
Phe-Trp-Lys-Thr-Phe-Thr-Ser-  
Cys-OH  
(Cys3-Cys14)

## Pricing and Availability

*Bulk quantities available upon request*

Product ID	Size	List Price
S5745	1 mg	\$113.20
S5745	2 mg	\$192.20
S5745	5 mg	\$340.20
