

Product Information

Product ID S5753

CAS No. 79243-10-0

Chemical Name

Synonym

Formula $C_{61}H_{105}N_{23}O_{21}S$

Formula Wt. 1528.72

Melting Point

Purity $\geq 95\%$

Solubility

Store Temp $-20^{\circ}C$

Ship Temp Ambient

Description Somatostatin is an endogenous neuropeptide hormone found in the brain and pancreas. Somatostatin binds several isoforms of the somatostatin receptor, exhibiting anxiolytic, antiepileptic/anticonvulsant, and anorexigenic activities. In vivo, somatostatin improves performance in the light/dark avoidance test. Somatostatin also suppresses seizures and prevents the generation of seizures, potentially through modulation of GABA signaling. Somatostatin induces cell death under hypoxic/ischemic conditions. In tumor cells, somatostatin displays pro-apoptotic properties, potentially involving the inhibition of PI3K/Akt signaling. Somatostatin also limits food intake and inhibits secretion of insulin and glucagon through alteration of G β signaling and P/Q-type N-type, and L-type voltage-gated Ca $^{2+}$ channel signaling.

H-Ser-Ala-Asn-Ser-Asn-Pro-Ala-Met-Ala-Pro-Arg-Glu-Arg-Lys-OH

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
S5753	1 mg	\$119.70
S5753	2 mg	\$365.40
S5753	5 mg	\$643.00
