Product Information

Product ID T3093

CAS No. 69558-55-0

Chemical Name

Synonym TP-5, RKDVY

Formula $C_{30}H_{49}N_9O_9$

Formula Wt. 679.8

Melting Point

Purity $\geq 95\%$

Solubility Soluble in water.

Store Temp $-20^{\circ}C$

Ship Temp Ambient

Description Thymopentin is a synthetic, immunomodulatory pentapeptide (thymopoietin, 32-36). In animal models of experimental autoimmune encephalitis (EAE), thymopentin decreases phosphorylation of I κ B kinase and inhibits production of HSP72, lessening disease severity. In other models, thymopentin decreases iNOS expression and activity, exhibiting potential anticancer chemotherapeutic benefit in the treatment of Sezary syndrome. In macrophages, this compound increases activation of NF- κ B. In other in vitro models, thymopentin binds to MHC II HLA-DR complexes and modulates T cell activity.

H-Arg-Lys-Asp-Val-Tyr-OH

Pricing and Availability

Bulk quantities available upon request

Product ID	Size	List Price
T3093	5 mg	\$189.00
T3093	10 mg	\$321.40
T3093	25 mg	\$567.00
