

10X TTBS pH 7.5 (1.0 M Tris HCl 1.5 M Sodium Chloride 0.1% (v/v) Tween-20) - MB-013
Code: MB-013

Size: 1 L

Product Description: 10X TTBS pH 7.5 (1.0 M Tris HCl 1.5 M Sodium Chloride 0.1% (v/v) Tween-20) - MB-013

Concentration: 10X

PhysicalState: Liquid (sterile filtered)

Label	Unconjugated
Buffer	See application note.
Stabilizer	None
Preservative	None
Storage Condition	Store container at room temperature (18° to 26° C) prior to opening. If desired, the solution may be stored at 4° C or less. Some salts may precipitate out of solution at lower temperature. Allow buffer to equilibrate to room temperature (18° to 26° C) to restore solubility of some salts.
Synonyms	TTBS, TBST, Tween Tris Buffered Saline
Application Note	TBST is suitable for molecular immunology, molecular biology and nucleic acid methodologies, when applicable. May be used as a wash buffer for immunological assays including western blot, immunohistochemistry, immunofluorescence microscopy, and ELISA.
Background	Tween Tris buffered saline is suitable for multiple applications including biological diluent buffer for antibodies or other biologics. Visit our newly expanded web site at www.rockland-inc.com for methods using this and other buffers. This product is a 10X concentrated stock solution and should be diluted appropriately with distilled, deionized water or equivalent to its final working concentration. This buffer consists of 1.0 M Tris HCl, 1.5 M Sodium Chloride and 0.1% (v/v) Tween-20 at a pH of 7.5. Meticulously prepared using ultra pure reagents dissolved in highly polished pharmaceutical grade deionized water.
Purity And Specificity	10X TTBS solution was aseptically filtered through a Millipore 0.22 micron filter into clean, pre-sterilized containers. The product was tested on trypticase soy agar for 24 hours, 48 hours and 72 hours and was found to be negative for bacteria.
ELISA	User Optimized
Western Blot	User Optimized
Expiration	Expiration date is six (6) months from date of opening.
Sterilization	This product was aseptically filtered through a Millipore 0.22 micron filter into clean, pre-sterilized containers. The product was tested on trypticase soy agar for 24 hours, 48 hours and 72 hours and was found to be negative for bacteria.
