

HRP Conjugate Stabilizer (Azide and Mercury Free) - MB-076-1000

Code: MB-076-1000

Size: 1 L

Product Description: HRP Conjugate Stabilizer (Azide and Mercury Free) - MB-076-1000

PhysicalState: Liquid (sterile filtered)

Label	Unconjugated
Buffer	See application note.
Storage Condition	Store container at 4° C before opening. Protect from moisture and light. No special shipping conditions or precautions are required.
Synonyms	HRP Conjugate Stabilizer, ELISA buffer, Western Blot buffer, Southern/Northern Blot buffer, lateral flow buffer, assay buffer
Application Note	This product is a "ready-to-use" 1X diluent for Horseradish Peroxidase (HRP) conjugated primary or secondary. This buffer contains buffered saline along with proprietary reagents to stabilize and preserve Horseradish Peroxidase (HRP) conjugated primary or secondary antibodies in solution. A proprietary combination of preservatives is used that is azide and mercury free. It is suitable for ELISA, Western Blot, Southern/Northern Blots, and lateral flow or directly as an assay buffer. This buffer is not recommended to be used in Luminol based assays.
Background	HRP Conjugate Stabilizer is to be used with Horseradish Peroxidase (HRP) conjugated primary or secondary antibodies or other proteins or compounds in solution. The components of the stabilizer (proprietary) are unique, and stabilize both the antibody and enzyme portions of the conjugate. HRP Conjugate Stabilizer prevents the loss of catalytic activity and maintains the active conformation of the antibody portion of the conjugate.
Purity And Specificity	This product was aseptically filtered through a Millipore 0.22 micron filter into clean, pre-sterilized containers. The product was tested on trypticase soy agar for 24 hours, 48 hours and 72 hours and was found to be negative for bacteria.
Expiration	Expiration date is one (1) year from date of opening.
Sterilization	This product was aseptically filtered through a Millipore 0.22 micron filter into clean, pre-sterilized containers. The product was tested on trypticase soy agar for 24 hours, 48 hours and 72 hours and was found to be negative for bacteria.

1	Rockland Immunochemicals produces a wide variety of buffers and substrates for use in ELISAs. Antigen was diluted in ELISA Microwell Coating Stabilizer (p/n MB-063-0100) added to the microwell plate and incubated overnight at 4°C. The plate was then blocked with ELISA Microwell Blocking Buffer with Stabilizer (p/n MB-064-1000) for 2 hours. The primary antibody was diluted in PBS Fish Gel Concentrate (1:10)(p/n MB-066-0100), added to the plate, and allowed to incubate 1 hour at room temperature. HRP conjugated secondary antibody was diluted in HRP Conjugate Stabilizer (p/n MB-060-0100), added to the plate, and allowed to incubate for 30 minutes at room temperature. TMB ELISA Peroxidase Substrate (p/n TMBE-1000) was added to the plate and allowed to incubate for 30 minutes at room temperature. The reaction was then stopped with 1M HCl and read at 450nm.
