

AGAROSE High resolution - high gel strength - MB-133-0025

Code: MB-133-0025

Size: 25 g

Product Description: AGAROSE High resolution - high gel strength - MB-133-0025

PhysicalState: Powder

Synonyms

High Resolution Agarose Blend, Easy to handle agarose, easy-to-handle agarose gels, biotechnology grade agarose, small nucleic acid fragments and PCR products agarose

Background

High Resolution Agarose is a unique mixture of agarose formulated to provide that yields strong gels with standard melting temperature for fine resolution of small DNA, RNA, and PCR products 1000 bp. This agarose shows precise banding patterns without smearing or high background fluorescence. The high gel strength allows for easy-to-handle gels that are optimal for blotting and applications analytical electrophoresis. The agarose is nuclease and protease-free.

Expiration

No expiration date is given for this product if properly stored.
