

Product Data Sheet

UGA 750 NHS ester [equivalent to Alexa Fluor 750 NHS ester] Catalog ID: 121602

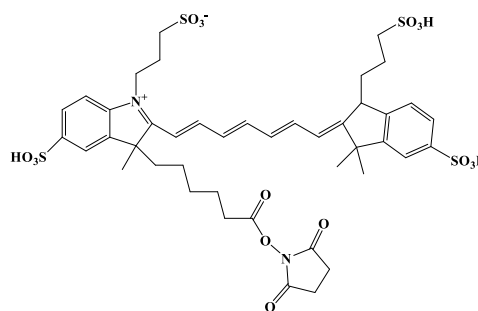

Revised: 2025-01-31

Description

UGA 750 is a bright and photostable near-IR dye that is spectrally similar to Cy7. It is widely used for reliable signal generation in imaging and flow cytometry, offering water solubility and stability across a pH range of 4 to 10. The fluorescence of this long-wavelength UGA dye is not visible to the human eye but is easily detected by most imaging systems. In addition to reactive dye formulations, UGA 750 dye is available conjugated to a variety of antibodies, peptides, proteins, tracers, and amplification substrates, making it an excellent choice for cellular labeling and detection.

Chemical Properties

CAS number	NA
Formula	C ₃₉ H ₄₉ NO ₁₄ S ₄
Molecular Weight	884.05
HPLC Purity	≥95%
λ _{abs} (nm)	749
ε _{max} (M ⁻¹ cm ⁻¹)	2.4×10 ⁵
λ _{fl} (nm)	775
CF ₂₆₀ =ε ₂₆₀ /ε _{max}	0.00
CF ₂₈₀ =ε ₂₈₀ /ε _{max}	0.04

Storage

Upon receipt, store at -20°C in the dark. Protect from light and moisture. When stored as indicated, UGA NHS-esters are stable for at least 1 years.

This product is for Research Use Only. Not for Human or Veterinary or Therapeutic Use
