

B-Cell Activation Factor Receptor (BAFFR) BioAssay™ ELISA Kit (Human)

Catalog number

023647

Supplier

United States Biological

B-Cell Activation Factor Receptor (BAFFR) BioAssay™ ELISA Kit (Human) is a sandwich enzyme immunoassay for in vitro quantitative measurement of BAFFR in human tissue homogenates, cell lysates and other biological fluids.

Detection Range

0.156-10ng/ml

Sensitivity

0.061ng/ml

Storage and Stability

Desiccation recommended. The Standard, Detection Reagent A, Detection Reagent B and the 96-well strip plate should be stored at -20°C upon receipt. Store all other reagents at 4°C. Stable for 6 months after receipt of order.

Specificity

Human

Storage

4°C/-20°C

Tests

0.061ng/ml

Sensitivity

100ul

Sample Volume

Tissue homogenates, cell lysates and other biological fluids

Sample Matrix

0.156-10ng/ml

Detection Range

Colorimetric

Antigen Modification

Human

Antigen Source

4896
