

Cartilage Oligomeric Matrix Protein (COMP) BioAssay™ ELISA Kit (Human)

Catalog number

023953

Supplier

United States Biological

Cartilage Oligomeric Matrix Protein (COMP) BioAssay™ ELISA Kit (Human) is a sandwich enzyme immunoassay for in vitro quantitative measurement of COMP in human serum, plasma and other biological fluids.

Detection Range

62.5-4,000pg/ml

Sensitivity

26.3pg/ml

Storage and Stability

Desiccation recommended. The Standard, Detection Reagent A, Detection Reagent B and the 96-well strip plate should be stored at -20°C upon receipt. Store all other reagents at 4°C. Stable for 6 months after receipt of order.

Specificity

Human

Applications

E

Storage

4°C/-20°C

Tests

26.3pg/ml

Sensitivity

100ul

Sample Volume

Serum, plasma and other biological fluids

Sample Matrix

62.5-4000pg/ml

Detection Range

Colorimetric

Antigen Modification

Human

Antigen Source

4896
