

MÉDIMABS

MÉDIMABS: YOUR “GO TO” SUPPLIER FOR QUALITY ANTIBODY SOLUTIONS

MédiMabs’ mission is to be the “GO TO” supplier, sought by biomedical researchers seeking quality antibodies and services that are required for the rapidly evolving, complex applications of their projects. Affordable antibodies are generated in a regulated laboratory environment and run by motivated scientists committed to respond to client's expectation.

MédiMabs’ Modus Operandi is based on the motto:

FROM RESEARCHERS, BY RESEACHERS, TO AND FOR RESEARCHERS

From Researchers

MédiMabs sources antibodies from institutes and academic laboratories. Working directly with Offices of Technology Transfer, we provide high quality known and novel monoclonal antibodies for research use.

By Researchers

Whether you need access to antibody-specific tools, expert peptide design or develop new monoclonal or polyclonal antibodies, from existing or newly discovered proteins, our research scientists, with specialized antibody experience, work with you from defining your needs to achieving proven results.

For Researchers

MédiMabs operates as as a specialized "Antibodies Boutique". It offers researchers high quality catalog antibodies, production of custom research grade monoclonal and polyclonal antibodies, and extensive services including peptide design and synthesis.

CATALOG ANTIBODIES AND SERVICES

De novo Generation of Antibodies

- **Monoclonal Antibodies:**
Mouse, Rat, Rabbit
- **Polyclonal Antibodies:**
Mouse, Rat, Rabbit, Chicken

Production of Antibodies

- Production of existing monoclonal antibodies
- Ascites production
- IgG purification from serum or culture supernatant
- Affinity purification of polyclonal antibodies
- Peptide design and synthesis

Antibodies/Kits

- Extensive antibody catalog for various fields of research: Cancer, Cell Biology, Signal Transduction, Nuclear Signaling, Cardiovascular, Innate Immunity, Neuroscience, Stem Cells, Developmental Biology, Microbiology, Virology
- Epitope tag antibodies
- Amplification kits for immunohistochemistry
- ELISA kits

Our clients include:

- McGill University
- University of Toronto
- Laval University
- University of Montreal
- Harvard University
- John Hopkins University
- University of Zurich
- CERBM-GIA (France)
- University of Milan (Italy)
- MIT
- INSERM
- Weizmann
- Freiburg
- A*STAR (Singapore)
- Technion (Israel)
- John Radcliffe Hospital
- Boehringer Ingelheim
- Max Planck Institute

Research and Development

- MédiMabs is continuously seeking out new opportunities for the development of research tools to address the scientific community's expectations in antibody application fields.

Commercialization

- License agreements for commercialization of existing monoclonal antibodies.
- MédiMabs has devised a royalty-based compensation program to facilitate the licensing and the marketing of valuable existing antibodies.

WE SHIP AND OFFER SERVICES WORLDWIDE

Please contact us today to learn how we can provide the specific products and services you need.
