

# SingleShot™ Buffers

The faster, more reliable way to prepare your lab buffers

distributed by  
**biomol**  
Part of Europa Biosite

Buffer preparation is an essential yet time-consuming part of research. With SingleShot™ Buffers, researchers can simplify this step and focus more on their experiments. These pre-measured, **ready-to-use** solutions help ensure consistency and reliability in every use, turning a typically long process into just 2 minutes of simple preparation. This shift means less time on preparation and more time on meaningful work, with the confidence of reproducible results.

## The SingleShot Advantage

See why SingleShot™ Buffers are the go-to solution for efficient lab preparation

### Convenient

- No weighing, calculations or adjustments
- Simply dissolve pouch contents in water and mix
- Reduced exposure to harsh chemicals

### Economical

- Low cost
- Takes up minimal storage space
- Longer shelf life

### Reproducible

- Firm QC testing for exceptional quality and reliability
- Physical tests: pH, solubility, pouch weights

### Versatile

- Available in 13 different formulations
- Adaptable for various lab experiments
