TargetMol

Introduction

Malignant tumors(cancers) are one of the major health problems posing a serious threat to human health, and for many years, human beings have been continuously conducting research on anti-tumor drugs.

TargetMol is always at the forefront of cancer-focused research. We provide comprehensive resources, including anti-tumor related small molecules, compound libraries, recombinant proteins, and antibodies to support anti-tumor drug discovery. We also provide computer-aided drug discovery (CADD) services tailored for your research on cancer-related drug screening.
