ImmuneSelect ELISpot  
2025 Catalogue

## ImmuneSelect ELISpot

### 2025 Catalogue

The ELISpot (Enzyme-Linked ImmunoSpot) assay is a powerful and highly sensitive technique used to detect and quantify specific secreted proteins, typically cytokines, at the single-cell level.

### Our Products:

We offer both pre-coated and non-coated ELISpot plates in a variety of kit sizes. Our pre-coated kits are ready-to-use, helping labs save time and reduce human touchpoints during setup, ideal for accelerating research workflows. Non-coated kits are an economical option that also offer more flexibility to meet a variety of experimental needs
